GENERAL CONDITIONS

Please Read Carefully

These Provisions Are a Part of Your Bid and any Contract Awarded

Scope of Bid/Proposal: Bids/Proposals are hereby requested for **FLOW MONITORING**, as per specifications herein.

The bidder agrees that:

- A. Bidder has carefully examined the specifications, and all provisions relating to the item(s) to be furnished or the work to be done; understands the meaning, intent, and requirements; and
- B. Bidder will enter into a written contract and furnish the item(s) or complete the work in the time specified, and in strict conformity with the City of Sparks specifications for the prices quoted.

Note: Bidder is defined as any individual, partnership, or corporation submitting a bid, proposal, or quotation in response to a request for bid (RFB), request for proposal (RFP), request for information (RFI) or request for quotation (RFQ). A bidder may also be referred to as a bidder, contractor, supplier or vendor.

The use of the title "Bidder," "Vendor", "Contractor" or "Consultant" within this solicitation document and any resulting contract shall be deemed interchangeable and shall refer to the person or entity with whom the City of Sparks is soliciting and/or contracting for the service or product referenced within the bid document.

1. Prices:

All prices and notations must be in ink or typewritten. Mistakes may be crossed out and corrections typed or written with ink adjacent to the error. Bids shall indicate the unit price extended to indicate the total price for each item bid. Any difference between the unit price correctly extended and the total price shown for all items bid shall be resolved in favor of the unit prices. Bidders are encouraged to review all prices prior to bid submittal, as withdrawal or correction may not be permitted after the bid has been opened.

2. Firm Prices:

Prices on bid shall be firm prices not subject to escalation unless otherwise provided for in the specifications. In the event the specifications provide for escalation, the maximum limit shall be shown, or the bid shall not be considered. In the event of a decline in market price below a price bid, the City of Sparks shall receive the benefit of such decline.

3. Items Offered:

If the item offered by the bidder has a trade name, brand and/or catalog number, such shall be stated in the bid. If the bidder proposes to furnish an item of a manufacturer or vendor other than that mentioned on the face hereof, bidder must specify maker, brand, quality, catalog number, or other trade designation. Unless such is noted on the bid form, it will be deemed that the item offered is that designated even though the bid may state "or equal".

4. Brand Names:

Whenever reference to a specific brand name is made by the City, it is intended to describe a component that has been determined to best meet operational, performance, or reliability standards of the City, thereby incorporating these standards by reference within the specifications. These specifications are not meant to limit the vendor; they are guidelines to minimum qualifications. The bidder shall indicate their compliance or non-compliance for each line of the specification. Any deviations from the specifications or where submitted literature does not fully support the meaning of the specifications must be clearly cited in writing by the bidder.

General Conditions

An equivalent (“or equal”) may be offered by the bidder, subject to evaluation and acceptance by the City. It is the bidder’s responsibility to provide, at bidder’s expense, samples, test data, or other documentation the City may require to fully evaluate and determine acceptability of an offered substitute. The City reserves the sole right to reject a substituted component that will not meet or exceed City standards.

5. Samples:

Samples may be required for bid evaluation and testing purposes. Bidders shall agree to provide samples upon request and at no additional cost to the City.

6. Withdrawal of Bids:

Bids may be withdrawn by written or facsimile notice received prior to the exact hour and date specified for receipt of bid. A bid may also be withdrawn in person by a bidder, or bidder’s authorized representative, prior to the exact hour and date set for receipt of bids. Telephone withdrawals are not permitted.

7. Late Bids, Modifications, or Withdrawals:

Bids, modifications of bids, or bid withdrawals received after the exact time and date specified for receipt will not be considered.

8. Mistake in Bid:

- (a) If the bidder discovers a mistake in bid prior to the hour and date specified for receipt of bid, bidder may correct the mistake by withdrawing the bid in accordance with Item 7 above and resubmit prior to the stated bid deadline.
- (b) If within seventy-two hours of the bid closing and prior to the issuance of a purchase order or a contract, the apparent low bidder discovers a mistake in bid of a serious and significant nature, bidder may request consideration be given to withdrawing the bid. The mistake must be evident and provable. The right is reserved by the City to reject any and all requests for withdrawal of bids. The decision of the Purchasing Manager is final as regards acceptance or rejection of requests for withdrawal after closing of bids.
- (c) A mistake in bid cannot be considered once a purchase order or contract is issued.

9. Signature:

All bids shall be signed and the title and firm name indicated. A bid by a corporation shall be signed by an authorized officer, employee or agent with his or her title.

10. Exceptions:

A bidder deviating from specifications must specify any and all deviation(s). Failure to note said exceptions shall be interpreted to convey that the bidder shall propose to perform in the manner described and/or specified in this bid solicitation. If exception(s) are taken or alternatives offered, complete descriptions must be shown separately.

11. Confidential Information:

Any information deemed confidential or proprietary should be clearly identified by the bidder as such. It may then be protected and treated with confidentiality only to the extent permitted by state law. Otherwise the information shall be considered a public record. Information or data submitted with a bid will not be returned.

12. Quality:

Unless otherwise required in the specifications, all goods furnished shall be new and unused.

13. Litigation Warranty:

The bidder, by bidding, warrants that bidder is not currently involved in litigation or arbitration concerning the materials or bidder's performance concerning the same or similar material or service to be supplied pursuant to this contract of specification, and that no judgments or awards have been made against bidder on the basis of bidder's performance in supplying or installing the same or similar material or service, unless such fact is disclosed to the City in the bid. Disclosure may not disqualify the bidder. The City reserves the right to evaluate bids on the basis of the facts surrounding such litigation or arbitration and to require bidder to furnish the City with a surety bond executed by a surety company authorized to do business in the State of Nevada and approved by The City of Sparks in a sum equal to one hundred percent (100%) of the contract price conditional on the faithful performance by bidder of the contract in the event the bid is awarded to bidder, notwithstanding the litigation or arbitration.

14. Royalties, Licenses and Patents:

Unless otherwise specified, the bidder shall pay all royalties, license and patent fees. The bidder warrants that the materials to be supplied do not infringe any patent, trademark or copyright and further agrees to defend any and all suits, actions and claims for infringement that are brought against the City, and to defend, indemnify and hold harmless the City from all loss or damages, whether general, exemplary or punitive, as a result of any actual or claimed infringement asserted against the City, the bidder or those furnishing material to bidder pursuant to this contract.

15. Performance Standards:

Performance of work and acceptability of equipment or materials supplied pursuant to any contract or award shall be to the satisfaction and full discretion of the City.

16. Americans with Disabilities Act (ADA) Standards:

Bidders shall be required to comply with current ADA Standards in preparing their bids and executing work required under any contract resulting from this bid. Completed work must comply with current ADA Standards.

17. Warranties:

(a) Unless otherwise specified, all workmanship, material, labor or equipment provided under the contract shall be warranted by bidder and/or manufacturer for a minimum of twelve (12) months after acceptance by City. Greater warranty protection will be accepted. Lesser warranty protection must be indicated by bidder on the bid proposal as an exception.

(b) Bidder shall be considered primarily responsible to the City for all warranty service, parts and labor applicable to the goods or equipment provided by bidder under this bid or award, irrespective of whether bidder is an agent, broker, fabricator or manufacturer's dealer. Bidder shall be responsible for ensuring that warranty work is performed at a local agency or facility convenient to City and that services, parts and labor are available and provided to meet City's schedules and deadlines. If required and defined within the Scope of Work, the Bidder will post a performance bond after contract award to guarantee performance of these obligations. Bidder may establish a service contract with a local agency satisfactory to City to meet this obligation if bidder does not ordinarily provide warranty service.

18. Addenda:

The effect of all addenda to the bid documents shall be considered in the bid, and said addenda shall be made part of the bid documents and shall be returned with them. Before submitting a bid, each bidder shall ascertain

General Conditions

whether or not any addenda have been issued, and failure to acknowledge any such addenda may render the bid invalid and result in its rejection.

All potential bidders are responsible for monitoring the City website regarding the availability of new bid documents or addenda (where applicable). The City of Sparks will not be responsible for the results of any potential failures in automatic notification systems to potential bidders or plan holders with respect to these documents and will not adjust bid schedules or requirements due to any potential failures of those systems. Bidder is responsible for complying with all applicable local, State and Federal wage laws, whether or not specifically cited in this bid document.

Per NRS Sections 338.020 through 338.090, certain projects defined as "public works" require the payment of the prevailing wage as determined by the Labor Commissioner. Generally speaking, projects/contracts for construction of a public work valued at less than \$250,000 are exempt from the prevailing wage requirement (NRS 338.080). If the protest is rejected, a claim may be made against the bond or other security by the governing body or its authorized representative in an amount equal to the expenses incurred by the governing body or its authorized representative because of the unsuccessful protest. Site reports shall be submitted to the City within five days of the site investigation. The site report shall include a sketch or photos of the location, description of the physical characteristics and diameters of the monitoring location, monitor type and accuracy for the installed configuration, flow characteristics, measurements, silt depth (identification of need for cleaning).

Wireless Flow Monitor: All monitoring equipment to be installed in the manhole must be certified as Intrinsically Safe for installation in hazardous areas. The monitor, modem and sensors must be certified for installation in Class I, Division 1, Group C & D/Zone 0 atmospheres meeting the National Fire Protection Association 820 standard. The monitor shall support a minimum of two configurable sensor input ports and one communication port. Sensor input ports shall be interchangeable to accept a variety of sensor configurations to match hydraulic conditions at each site. At least one sensor must be a wetted Doppler Area Velocity sensor to overcome frequent surcharging within the system. The primary depth measurement under normal free flow conditions must be an Ultrasonic to overcome pressure sensor drift, under surcharge conditions depth shall be measured by a submerged and daily calibrated pressure transducer.

Site Installation: FSP shall install flow monitoring equipment within one week of notification from the City that the proposed monitoring locations are approved. The FSP shall verify that the flow monitors are accurately reporting data. Flow readings shall be recorded at maximum intervals of fifteen (15) minutes.

Initial Monitor Verification - the City will not accept any options or proposals from any FSP to waive physical hydraulic confirmations. Initial confirmation of the flow monitors shall involve a minimum of three (3) in-manhole measurements taken on different times of day. These initial confirmations shall be obtained within twelve months of monitor installation and will compare manual readings to sensor readings for all depth and velocity sensors. The instantaneous depth of flow measurement shall be taken from the bottom of the pipe to the top of the flow as well as from the crown of the pipe to the top of the flow and both results shall be recorded. Attempts shall be made to have these measurements done at flow levels that span typical dry daily flows. There will be a manual depth reading for silt which will be recorded and accounted for during data analysis/finalization.

The six flow monitoring site locations are:

City of Reno Monitoring Locations	Type of Pipe	Access to Sewer
1. Reno — Ninth/G Street - travel lane in high traffic street	32-inch concrete	48-inch manhole; 18 ft deep
2. Reno — Second Street - shoulder of plant access road	28-inch CIPP lined	48 -inch manhole; 19 ft deep
3. Reno — Clean Water Way - shoulder of plant access road	60-inch concrete	48-inch manhole; 18 ft deep; peak flow surcharge

6. Sparks — Sparks Boulevard - shoulder area; no traffic	42-inch concrete	48-inch manhole; 19 ft deep; peak flow surcharge

Flow Monitoring

Once all flow monitors are installed and verified, the flow monitoring period shall begin. The FSP shall provide a system-wide uptime of 95% or greater. Uptime is defined as number of valid 15-minute flow data points divided by total number of 15-minute intervals in the month. If system-wide uptime requirements are not met, the amount due the FSP will be reduced. The payment due will be calculated monthly, based on verified performance (as reported by the FSP). Payment would then be authorized as follows:

% of Monthly Uptime	% of Normal Monthly Amount Payable
= 95	100
= 80	75
= 70	50
= 60	25
= 50	0

Preventative/Routine Maintenance: The FSP shall visit the monitoring locations and enter the manhole/monitoring locations as necessary to inspect the monitoring equipment, clean sensors, reset sensors, replace batteries, recalibrate or verify flow readings, or perform other periodic maintenance necessary to maximize collection of useable flow monitoring data. FSP shall have extra flow meters available, as necessary, to replace malfunctioning units. Manual depth and velocity readings shall be collected at each monitoring location as needed to ensure continued data accuracy.

Data Collection, Data Processing and Reporting

Data Collection: The flow monitoring system shall automatically collect data from all telemetered flow meter sites (Raw Data) at a minimum each day and whenever a defined alarm condition occurs. In addition, the system shall have the ability to issue a data collection command in order to obtain data in near real time. Twice-weekly Data Review shall be performed by the FSP on the raw data to ensure that the equipment is operational and properly logging data.

Data Quality: The FSP shall be expected to provide valid data points each calendar month. Valid data points are defined as final data that accurately reflects the hydraulic conditions present where the sensors are installed and is not skewed or inaccurate due to debris, malfunctioning sensors, or other problems. Provide a statement in the Proposal guaranteeing the delivery of valid data. Invalid data includes, but is not limited to:

- Erratic or zero flow readings for more than 48-hours
- Unexplained high variations in flow readings
- Flow values trending upward due to debris buildup and sensor problems
- Unexplainable inconsistent trends between meter results

Monthly Data Analysis: During the monitoring period, raw data will be analyzed by the FSP and reported to the City on a monthly basis as Final Data. Data Analysis shall be performed by an analyst with a minimum of two (2) years of direct experience. Final data will be reviewed and confirmed by an analyst with a minimum of 10 years' experience. The monthly analysis will consist of calculating flow at each monitoring location, plotting the flow data, and analyzing depth vs. velocity scattergraphs to evaluate monitor accuracy. Finalized flow datasets shall be posted for the previous month to the website by the 5th of the following month.

Web Data Delivery: The Provider shall supply a software system that is accessible using Microsoft® Internet Explorer version 10.0 or greater and available to any personnel requiring access. The Provider shall host all data in a central database to ensure that any modifications to the central data are available to all other users of the system. The software system shall have unique password security for each user. Each user shall be permitted to perform only authorized functions that can be restricted by permissions shall include, at a minimum, alarm acknowledgement, reporting, viewing specific data types, viewing data and information from specified locations, telecommunications, and any system configuration (such as adding new users). The software system shall allow for the upload of final edited data and shall maintain a copy of both the final and the original data after each upload. The system shall support the following types of configurable reports:

- Hydrograph – a time series graph of multiple data types with the ability to segment data based on intervals (e.g. “weekly”) over the user specified time period;
- Scattergraph – a depth to velocity graph for the specified time period with the ability to select a data point to see the actual value for that data point;
- Tabular – both tables for viewing and a CSV format for download shall be available.
- Alarm report providing information about all alarms generated by the monitoring system including alarm type, alarm status and users who have acknowledged the alarms;
- Confirmations report providing a list of manual measurements taken at a monitoring location within a specific date range;
- Data Collect Summary report providing the number of successful and failed attempts and the percentage of successful attempts to collect the data from selected monitoring locations;
- Capacity trend reports indicating the average and maximum capacity used for each monitoring location for the last 24-hours, compared with a user specified time range, as a percentage of the theoretical capacity for each site;
- Surcharge trend reports indicating the percentage of time that each site was in a surcharge condition

(depth greater than full pipe) over the last 24 hours, past 30 days or past 90 days, compared with a user specified time range; and

- Percentage-full trend reports indicating percentage of full pipe trending over the last 24 hours, 30 days or past 90 days, compared with a user specified time range.

All flow meter data shall be available to view and export electronic data in Microsoft Excel format from a website provided by the FSP for a date range entered by the user. The FSP shall conduct a customer training on website navigation and features, including report generation. Monitoring data shall be provided in printed graphical format, as well as
