**Mary Wahl Drain Valve Replacement
Informal Quote**

Addendum No. 1

May 13, 2013

1. Proposal Due Date and Time:

The due date and time for submitting an Informal Quote Proposal for this project are:

Tuesday, May 21, 2013 at 4:00 PM in the hands for the City Project Manager in the Sparks Community Services Dept. – Engineering.

2. Diversion of Irrigation Water Flows:

The Mary Wahl Drain receives diverted irrigation water from the North Truckee Ditch during the irrigation season (presently flowing). City personnel will divert this flow during installation of the backflow valve. The ability to divert the flow during the irrigation season is dependent upon weather conditions: A window of 2 to 3 days, and possibly longer, is typical during the irrigation season.

The Contractor will be responsible for controlling interim dry weather nuisance flows. The closest storm drain manhole is approximately 90 ft northerly of the location of the new valve, in the shadow of the cottonwood tree.

3. Powder Coat finish:

See attached clarification to powder coat specification. Color to be selected by the owner from standard colors.

End of Addendum No. 1

TECHNICAL SPECIFICATIONS

Mary Wahl Drain Backflow Valve

Replacement for PART I -MATERIALS

- G. **Surface Protection:** Power coating is required for all steel members before placement. Powder coat finishes shall be applied as three coats – primer, color, and clear coats. The clear coat shall include components to protect against UV degradation and improve weatherability. Paint of a matching color shall be applied to exposed hardware and to touch up members. Paint shall comply with Orange Book Standards. Color shall be determined by the owner.
