

The Human Services Network (HSN) is a coalition of more than 60 Nevada health and human services providers with a mission to drive positive change for human services providers and their clients through the focused and collaborative action of a large collective of organizations and individuals. To put this another way: *HSN is a community for those passionate about the importance of health and human services.*

The **Politician of the Year Award** is given to someone who demonstrates exemplary efforts as a city, county, state or national politician on behalf of human services and is based on demonstrated achievements.
