

Good afternoon,

For the record

Ardena Perry

I am here today to openly plead with the Sparks City Council. I am requesting you formally oppose SB 434 which would strip away the voting rights of Sparks citizens. Our most involved, informed and intuitive citizens have gone to Carson City to defend the right of the public to protect independent legal decisions. The suggestion that " somehow" a subordinate will be allowed unbiased legal opinions is ludicrous. The time to stop this is right now, in committee, and protect our future from this constant interference of our voting rights by the State. I provided the video to fully inform you of public sentiment.
