To Whom It May Concern:

Subject/Purpose: The Security of the Electrical Grid and Community/Nation Sustainability.

Thank you for the opportunity to meet with you. Within recent months I have begun an active public effort to encourage community leadership to take a more determined effort relative to electrical grid security and community welfare. My emphasis has been on the effect of a high impact event which impairs the ability of the grid to service our community, especially lifeline infrastructures and overall life support. Be assured that my concerns are under-pinned after considerable research.

My outreach effort has included meetings with the Sparks City Council, Reno City Council and the Washoe County Commission. My plan is to continue touching as much community leadership possible with an ever increasing informed approach.

I would appreciate your assistance and advice. Please note that I have included a short summary of my professional career

Sincerely,

Donald E. Dixon
