

INTRODUCING 39 NORTH DOWNTOWN

We are business owners who care about improving our community and breathing new life and energy into Downtown Sparks. We see Downtown Sparks as an intersection of businesses and families where great experiences are created.

Our Goal: Sparks is a wonderful community that has built great family-friendly special events. Our desire is to be catalysts for change, a change that extends beyond business. Our goal is to connect local businesses and outside investors and to make our vision a reality.

Our Vision: It starts with an attitude about doing business. It begins with people and ideas. It is about local interaction, initiative and growth. It will enhance the vitality of the community by combining the energy of existing businesses and new businesses. It is the place people want to be. It is the new Sparks.

Our City: The City of Sparks has developed an updated Transit-Oriented Development (TOD) Corridor Master Plan to help clearly illustrate the long-term vision for the corridor. The TOD Corridor is the civic, entertainment, and employment heart of the city that represents its past, present, and future in a seamlessly integrated and active environment.
