RE: TRUCKEE MEADOWS WATER RECLAMATION FACILITY – SCOPE OF WORK FOR ASSET TAGGING AND DATA COLLECTION

Kim:

Farr West Engineering (Farr West) appreciates the opportunity to submit this Scope of Work (SOW) and fee estimate for asset tagging and data collection services. Data collected by Project tasks will be used to populate the databases for the TMWRF asset management and computerized maintenance management systems. Expansion of these databases will provide improved capabilities for facility fiscal and maintenance planning. Asset tagging will allow for accurate and efficient location of assets in the field for operational and maintenance purposes.

PART 1 - SERVICES

TASK 1 – PROJECT MANAGEMENT

Approach

Farr West will review project progress and communicate project status on a regular basis with TMWRF. Communication with TMWRF will be primarily through email and telephone. Project coordination meetings will be held internally with Farr West staff. This task will include the following activities:

- Provide routine project management and communications (scope, schedule, budget, invoicing, etc.).
- Coordination of Farr West support staff.

Deliverables

The following deliverables will be submitted under this task:

- Monthly invoices.

Assumptions

The following assumptions apply:

- Project will have a seven-month (7 invoice) duration.

TASK 2 – ASSET TAGGING AND DATA COLLECTION

Approach

Approximately 2,900 assets are estimated to remain for inclusion into the TMWRF eRPortal system. Farr West will work in coordination with TMWRF staff to develop and install field tags for each asset and produce data necessary to effectively incorporate each asset into the eRPortal database.

The following activities will be performed as part of this task:

- Evaluate existing asset data for accuracy, completeness, and conformance with TMWRF guidelines and requirements.
- Generate revised asset descriptions and tag ordering list and submit to TMWRF personnel for review. Non-asset labels for motor control centers and panels will be included in tag list submitted for review in addition to tag ordering lists for assets.
- Order, receive, print, and install field tags.
- Schedule and perform walkthrough of each Process Area with TMWRF personnel to check that all assets have been identified and tagged.
- Repeat evaluation, tag ordering list preparation, ordering, and installation of field tags for any assets added from walkthrough with TMWRF personnel.
- Collect data required to complete the eRPortal upload template.
- Schedule and perform meeting with key TMWRF personnel to determine condition, consequence of failure, approximate replacement cost, and approximate installation date for assets in each Process Area.
- Complete and submit eRPortal upload template for each Process Area.

Deliverables

The following deliverables will be submitted under this task:

- Tag ordering lists in Microsoft Word or Excel format for TMWRF review for each Process Area.
- Electronic (csv) file for each Process Area (Building) formatted for direct upload to eRPortal.

Assumptions

The following assumptions apply:

- Previous tagging and data collection efforts have seen an approximate 40% increase between originally identified asset counts and final asset counts. This increase represents the addition of previously unidentified assets discovered through the evaluation process of the Project.
- Known remaining assets total approximately 2,100 which adjusts to approximately 2,900 when the 40% increase is added.
- TMWRF will pay for production of plastic and stainless steel tags from manufacturers. Farr West will coordinate with manufactures to place orders, track orders, and receive orders.
- TMWRF will supply equipment to install tags including stainless steel cable, sleeves, and swaging tools.
- Two (2) Farr West employees will each spend 40 hours per week on this Project. This includes

field and office time.

- Previous tagging and data collection efforts have seen an approximate completion rate of 12.5 assets/person/day. Two employees working 40 hours/week each are estimated to complete 125 assets per week on average.
- TMWRF staff will be available to provide timely responses to questions and to attend regular meetings. Meetings will be required weekly and occasionally more often.
- Assume one 13-mile roundtrip/person/day to calculate mileage.

TASK 3 – UPDATE EXTERIOR VALVE AND VAULT EXHIBITS

Approach

Previous work by other Consultants included survey of exterior valve boxes and production of a series of exhibits displaying the survey points titled *Site Valve Cover Survey*. Approximately 200 valve boxes are displayed in the *Site Valve Cover Survey* exhibits.

Previous tagging and data collection efforts by Farr West assigned Asset IDs, produced field tags, and collected data for approximately 170 assets identified on the *Site Valve Cover Survey* exhibits. Unidentified assets were not assigned Asset IDs and were left for identification later. Farr West proposes to create modified exhibits which include the assigned Asset IDs to create a visual reference for exterior valve locations.

Deliverables

The following deliverables will be submitted under this task:

- Electronic (pdf and dwg) and two (2) hard copies of full size (22"x34") bond exhibits.

Assumptions

The following assumptions apply:

- Final modified exhibits will replace the survey tag identifier shown on the *Site Valve Cover Survey* exhibits with the assigned Asset ID in the exhibit plans and Valve Location Schedule table.
- Unidentified assets will continue to be identified by the survey tag number unmodified from the original survey exhibits.
- Exhibits will be placed on TMWRF standard drawing title block.

TASK 4 – OWNER DIRECTED SERVICES

Task to cover the costs of Project work items that are currently unforeseen by TMWRF, a task budget of \$10,000 is incorporated into this Contract. Labor effort will not be charged to this task unless authorized by TMWRF.

PART 2 - SCHEDULE

Farr West proposes to continue ongoing work seamlessly into the next fiscal year starting at the beginning of July 2018. The estimated production rates calculate a Project duration of approximately 24 weeks.

- Project work to begin on July 2, 2018

- Estimated Completion in January 2019

PART 3 - COMPENSATION

Farr West proposes to perform the above Scope of Work for an estimated fee not to exceed \$191,700. The following outlines our cost per task:

- Task 1 – Project Management: \$2,000
- Task 2 – Asset Tagging and Data Collection: \$177,700
- Task 3 - Update Exterior Valve and Vault Drawings: \$2,000
- Task 4 – Owner Directed Services: \$10,000

Project work is proposed to be billed on a Time and Expense Basis per the attached Farr West Engineering 2018 Rate Schedule. Billing will be based on actual hours spent on the project and may exceed the estimated amount, based on the level of effort required to complete the project scope. The estimated fee will not be exceeded without prior authorization.

We would like to thank you again for this opportunity to perform these services for your Facility. Please contact us at (775) 851-4788 if you have any questions regarding this scope of work.

Sincerely,

Matt Schultz, P.E.
