Brian Allen  
City of Sparks  
Sparks, NV 89434

Brian,

Global Technology Systems is leading manufacturer of portable power solutions. As such we provide batteries and chargers to Federal, State and Local government agencies including the FBI, DOJ, DHS, Las Vegas Metropolitan Police, the City of San Antonio, the City and County of Honolulu, and many other public safety agencies.

GTS is the only manufacturer of **NEOCELL** Lithium Ion Polymer batteries. We were tasked to develop these batteries by the City of San Antonio, who experienced problems so significant with their P7100 radios that they filed a grievance with the City Council that this was an officer safety issue.

The quality and performance of our products is of primary importance. GTS' **NEOCELL** technology offers significant advantages over other products on the market which include:

- **Longer run times** – multiple shifts of operation on a single charge
- **Improved cycle life** – 850+ charge cycles vs. 500 on Nickel batteries or Lithium Ion
- **Lighter weight** – approximately half the weight of similarly rated Nickel batteries
- **No memory effect** – no need for conditioning equipment or staff hours
- **Wider temperature tolerances** – best chemistry available for environmental temperature extremes -20°C to +70°C
- **Long term charged storage** – lowest self discharge rate...store fully charged for 10+ months
- **2 year warranty** – longest warranty in the industry

GTS has been supplying NEOCELL batteries to Washoe County public safety officials for several years now. Consequently, Washoe County receives the lowest discounted pricing nationwide. I have attached the Washoe County price schedule, and your agency has been offered this same discounted pricing.

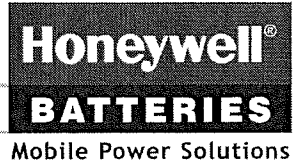

On P2 of this letter you will find a list of local references from other NV Public Safety officials using our NEOCELL technology. I would encourage you to speak to them regarding their experience with our products and how NEOCELL has improved their ability to communicate in critical situations.

Please let me know if I can be of further assistance.

Sincerely,

Diane Wirtz  
North American Sales Manager-  
Public Safety

Productivity through great engineering
