

Dear Robert:

Congratulations! On behalf of the Home Fire Sprinkler Coalition (HFSC), thank you for your efforts to make home fire sprinkler education a focus of your department's outreach activities. As one of only six percent of U.S. fire departments teaching about this life-saving technology, you have earned formal designation as a "Built for Life Fire Department."

HFSC is committed to helping fire departments increase home fire sprinkler awareness among children and adults. We know fire service resources are tight, especially for public education, so we develop turnkey tools and guidance that you can put to good use.

As a "Built for Life Fire Department" you will always be the first to receive our new materials. And, HFSC is committed to development efforts in order to garner the financial support that makes it possible to provide our materials to fire departments at no charge.

LET'S GET STARTED!

We hope you're eager to get started teaching your community about home fire sprinklers, or to increase your existing efforts. To help you do that, enclosed are two of HFSC's finest materials:

Education Kit: Tips, tools and educational materials to help you reach people of every age and occupation in your community.

Fire and Sprinkler Burn Demonstration Kit: Material and tool lists, construction instructions, guidance for demonstration and education presentations and other support material you'll need to build a side-by-side burn demonstration unit.

We've also enclosed a customizable news release to help you get local publicity for your efforts. The "Built for Life Fire Department" decal and cap will help you proclaim your new designation.

Of course, we hope you will also visit HFSC's Web site frequently: HomeFireSprinkler.org. You'll find free videos, animations and other downloads to support your presentations, along with a wealth of other teaching tools.

Thank you for all that you do to help your community stay safe and for making the important topic of home fire sprinklers a focus of your educational outreach. We look forward to working with you!

Sincerely,

Peg Paul
